TATENDA CHITANDA

Compliance Analyst | AML & KYC | Financial Crimes Investigator

Okatie, SC, USA | tchitanda6@gmail.com | linkedin.com/in/tatenda-chitanda

PROFESSIONAL SUMMARY

Detail-oriented compliance and risk professional with 10+ years of experience in regulatory compliance, risk assessment, and anomaly detection across complex operational environments. Skilled in identifying suspicious activity patterns, evaluating data integrity, and producing clear investigative reports with actionable recommendations. Formal experience as a Cybersecurity Analyst at CodeAlpha, conducting threat investigations, monitoring for suspicious activity, and escalating findings through structured review processes. Background further spans information security governance (ISO/IEC 27001), SIEM-based threat monitoring, and structured data analysis, all of which transfer directly to Anti-Money Laundering (AML) and Know Your Customer (KYC) investigation workflows. Founder of Sentracore LLC, a compliance and cybersecurity consultancy. Committed to meeting quality standards, adhering to designated timeframes, and ensuring full compliance with applicable federal and state laws and client-specific regulatory requirements.

CORE COMPETENCIES

Anti-Money Laundering (AML)	**Know Your Customer (KYC)**	**Suspicious Activity Identification**
Transactional Monitoring	**Fraud & Financial Crime Detection**	**Sanctions & Compliance Awareness**
Data Anomaly Detection	**Regulatory Report Writing**	**Quality Control & Review Standards**

ISO/IEC 27001 Compliance	**SIEM Analysis (Splunk/Chronicle)**	**SQL Data Querying & Analysis**
Risk Assessment & Escalation	**Microsoft Office & Excel**	**Federal & State Law Compliance**

PROFESSIONAL EXPERIENCE

Founder and Compliance Director | Sentracore LLC

2025 to Present | Okatie, SC, USA

- Designed and implemented compliance audit frameworks and risk assessment checklists for SMB clients, identifying policy gaps, control failures, and regulatory red flags requiring escalation to senior review.
- Interpreted and operationalised client-specific compliance policies related to data governance, access controls, and regulatory obligations, ensuring alignment with applicable federal and state requirements.
- Produced written investigation and audit reports summarising findings, risk ratings, and recommendations for remediation, submitted for client quality control review and revised based on feedback.
- Evaluated third-party and vendor relationships against defined compliance criteria, flagging anomalous data patterns and inconsistencies for second-level review.
- Delivered training programmes to non-technical audiences on identifying suspicious digital activity, social engineering indicators, and compliance obligations relevant to their operational context.

Cybersecurity Analyst | CodeAlpha

March 2026 to August 2026 | Remote

- Monitored network traffic and system logs to detect anomalous behaviour, suspicious activity indicators, and potential security incidents, applying structured analysis frameworks to triage and escalate findings for second-level review.
- Conducted vulnerability assessments and threat investigations, documenting findings in clear written reports with risk ratings and recommended remediation actions, submitted for internal quality review and revised based on feedback.
- Analysed data patterns across multiple systems to identify irregularities and red flags consistent with unauthorised access, policy violations, and compliance breaches, maintaining accurate case records throughout each investigation.
- Applied defined investigation procedures and compliance frameworks consistently across assigned cases, adhering to designated timeframes and production quality standards in a team-oriented environment.

AI Data Analyst and Quality Reviewer | Outlier AI (Aether Project)

June 2025 to March 2026 | Remote

- Classified and evaluated large structured and unstructured datasets with 98% accuracy, applying rigorous quality control standards to identify anomalies, inconsistencies, and data integrity issues requiring escalation.
- Applied defined criteria and scoring rubrics to assess AI model outputs, flagging non-compliant or suspicious patterns and submitting findings for internal review teams.
- Adhered strictly to designated timeframes and production standards across concurrent review tasks, maintaining accuracy under volume pressure.
- Provided structured written feedback to refine annotation guidelines, demonstrating the ability to translate investigative findings into clear, actionable documentation.

INVESTIGATIVE AND ANALYTICAL PROJECTS

Security Incident Investigation | Cybersecurity Lab

2025

- Investigated a simulated phishing and account compromise incident: evaluated transactional and access logs to trace the attack chain, identified suspicious activity indicators, documented findings, and produced a structured report with recommended remediation steps.

SIEM Suspicious Activity Monitoring | Splunk Lab

2025

- Used Splunk SIEM to monitor system event data, identify anomalous activity patterns, and generate actionable investigation reports, mirroring core AML transaction monitoring and suspicious activity reporting workflows.

SQL Database Analysis | Security Data Lab

2025

- Queried relational databases using SQL to filter, join, and extract records for investigative analysis, applying data-anomaly detection logic to identify irregular activity patterns within large datasets.

EDUCATION AND CERTIFICATIONS

MSc Cybersecurity with Artificial Intelligence | University of Central Lancashire

Google Cybersecurity Certificate | Coursera | 2025

ISO/IEC 27001:2022 Lead Auditor | Mastermind | 2025

Cyberlaw | Udemy | 2025

EC-Council Essentials: Network Defense, Ethical Hacking, Digital Forensics | EC-Council | 2025

Cybersecurity Management and Leadership | Macquarie University | 2025

AI for Cybersecurity | Macquarie University | 2025

AWS Certified Cloud Practitioner | Udemy | 2025

Computer Networks Security | EC-Council | 2025

Google AI Essentials | Coursera | 2025

Engineering Studies N4-N6 | South Africa | 2018

ADDITIONAL INFORMATION

- Published researcher on AI governance and cybersecurity compliance (ResearchGate, 2026).
- Active contributor to information security forums and professional development communities.
- Dual commitment to quality and accuracy maintained across all professional output, with a track record of meeting production targets and incorporating quality control feedback.
